

Neat+™ by Cardinal Glass Industries is the best choice for keeping your windows cleaner, longer.

Neat+ is a durable and permanent coating composed of titanium dioxide (TiO<sub>2</sub>), applied using Cardinal's patented spray-on process.

## Neat+ The Next Generation

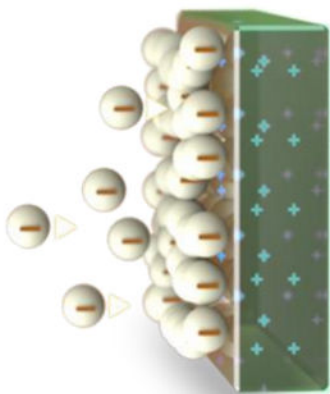

Since 2006, more than 50 million Neat glass-coated windows have been sold.

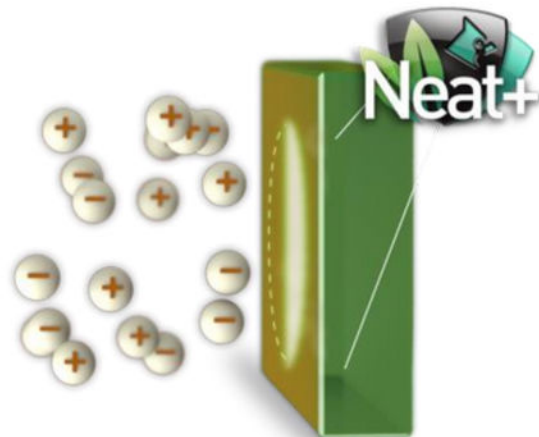

Improved performance through improvements in the quality and purity of materials used.

## Neat+ is anti-static

### Uncoated glass

Less conductive, attracting more dust/dirt

### Neat+ antistatic

Neat+ is more conductive, reducing up to 40% less dust/dirt on the window

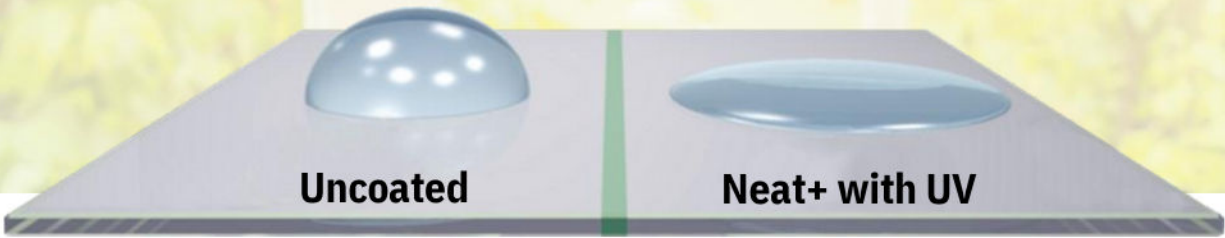

Neat+ stays cleaner, longer. You save time, money, and resources.

# Neat+ works with the sun

Neat+ naturally reacts with the sun's UV rays to break down greenhouse gases like methane and other pollutants.

## Neat+ breaks down pollutants 25% better than the original Neat.

With enough UV, Neat+ will cause water to run off, instead of beading like uncoated glass, reducing staining.

	Uncoated	 Neat+	 Neat+ With UV
<b>Antistatic</b> Less dust and dirt	+	+	+
<b>Cleans more easily</b> Less dust/dirt to remove	+	+	+
<b>Fewer resources needed</b> Less chemicals and water	+	+	+
<b>Water can flow</b> Dries faster / Fewer water spots	+	+	+
<b>Breaks down pollutants</b> Comme les gaz à effet de serre	+	+	+

Neat+ is available with all Cardinal LoE® products and will not affect the performance or color of the window.

All standard glass cleaning products can be used with Neat+.
